CDLD representations in the Korean Medical Licensing Examination

Information for examinee and item analysis from response correctness

KMLE 2017

3,259 examinees × 360 items

1,173,240 binary responses

→

CYCLIC DUAL LATENT DISCOVERY

Student Latent Finder ↔ Item Latent Finder

Alternating updates → frozen 64-dimensional vectors

2PL ABILITY

Augmented summaries	**0.9289**
+ SVD64	**0.9594**
+ CDLD	**0.9843**

R^2 · exploratory nested-CV comparison

2PL LOG DISCRIMINATION

Augmented summaries	**0.8759**
+ SVD64	**0.8950**
+ CDLD	**0.9216**

R^2 · exploratory nested-CV comparison

CDLD adds predictive information beyond augmented summaries and SVD64.
